**Languages:** Java, Python, JavaScript, C, C++, Go, TypeScript, Solidity, SQL, HTML, CSS

**Technologies:** React, Git, Node.js, Express, GraphQL, Firebase, Docker, MongoDB, Linux, NoSQL, MySQL, Kubernetes, Redis, Pandas, NumPy, Nginx, AWS EKS/S3, Truffle

## WORK EXPERIENCE

---

### Visa

Software Engineer Intern

Highlands Ranch, CO

May 2021 - August 2021

- Developing Java APIs on the Debit Processing Services Team for third-party companies
- Filling product backlog and delivering production-ready code in 2 week Scrum sprints

### Minos Labs

Full Stack Development Intern

Jersey City, NJ

January 2021 - April 2021

- Coordinated refactoring of legacy code to modularize components and styling, reducing codebase size by 18%
- Implemented SignEasy API using React and Firebase to establish hiring document pipeline for 100% of clients
- Engaged in Scrum sprints following Agile methodology for feedback on product features to ensure deliverables

### Commvault

Development Operations Intern

Tinton Falls, NJ

September 2019 - January 2020

- Created a Go shell script using kubectl to automate the creation and deletion of Kubernetes clusters
- Enabled script compatibility with AWS EKS and local providers on Windows and Linux systems
- Provided a basis for the Commvault Kubernetes team to test and create Kubernetes-related products

## LEADERSHIP EXPERIENCE

---

### Undergraduate Student Alliance of Computer Scientists

Outreach Director

New Brunswick, NJ

April 2021 - Present

- Coordinating networking events and an alumni network to connect Rutgers students with prominent companies
- Organizing speaker events to educate Rutgers students about various industry-relevant technologies

### CreativeX

Technology Director

New Brunswick, NJ

December 2020 - Present

- Implementing technical club initiatives from Figma designs into production web applications using React
- Built the official Rutgers designathon website using Next.js, attracting over 500 peak monthly users

## PROJECTS

---

**Blackjack++** Created a Blackjack console game using C++ following OOP principles and MVC patterns

**DeBank** DApp built with Solidity and web3.js that enables users to deposit, withdraw, and loan ether

**DockerOps** Applied Docker workflow to build an Express application using Mongo, Redis, and Nginx services
